Junior Software Developer

I am a junior full-stack software developer. I graduated from the Computer Engineering program at UNI-Nicaragua and I have been working at "Instituto Nicaragüense de Seguridad Social" since almost 3 years ago as a Ruby on Rails, Node JS and React js junior developer. I am self-taught, innovative and team player, always willing to learn new things and adopt new technologies. Recently, I have been focusing on exploring emerging web technologies and enhancing my understanding of Object-Oriented Programming (OOP) and SOLID programming principles.

Expertise

Languages & Frameworks

- ✓ HTML & CSS
- ✓ JavaScript
- ✓ Bootstrap
- ✓ Node JS
- ✓ Express JS
- ✓ React JS
- ✓ Ruby
- ✓ Ruby on Rails
- ✓ Java
- ✓ Tailwind CSS

Databases
